SAW BLADE Ø200 FOR 90° ANGLE GEAR DEVICE - BORE Ø50 (6 HOLES Ø80) - GRANITE

This segmented saw blade allows for thin sawing with a precise cut. Suitable for making a non-slip surface on stairs, for example.

0

014522**SAW BLADE Ø260 FOR 90° ANGLE GEAR DEVICE - BORE Ø50 (6 HOLES Ø80) - GRANITE**

Segmented sawing disc.

Allows for thin sawing with a precise cut, suitable for making an anti-slip surface on stairs for example.

0

016376**SAW BLADE Ø1350 - BORE Ø100 - GRANITE**

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

0

016610**SAW BLADE Ø1100 - LASER PLATE - BORE Ø100 - GRANITE**

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

0

021857**SAW BLADE Ø1350 - BORE Ø100 - MEDIUM HARDNESS LIMESTONE**

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

0

016611**SAW BLADE Ø1100 LAZER CUT LIMESTONE**

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

0

018891**SILENT SAW BLADE Ø600 BORE Ø40/50- MEDIUM HARDNESS LIMESTONE**

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

0

023349**SAW BLADE Ø1600 L24 H10 EP10- BORE Ø40/50 LIMESTONE**

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

025431

SAW BLADE Ø400 - SEGMENT 40X3.6X7 - BORE Ø50/Ø60- MARBLE / HARD STONE

Specific disc for use with marble, hard stone and for high cutting speed.

Only suitable for current machines equipped with disc rotation variator, amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0 019623

HORIZONTAL SAW BLADE Ø300 - REINFORCED STEEL CORE - BORE Ø60 (6/Ø100) - GRANITE

A thick segmented disc used horizontally for rapid shaping.

Generally referred to as a crushable disc, it is known for its price to performance ratio.

0 020396

SILENT SAW BLADE Ø400 - BORE Ø50/60 - GRANITE / QUARTZ

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

0 020414

SAW BLADE Ø600 SPEEDMASTER PLATE - BORE Ø50/60 - GRANITE / QUARTZ

Specific disc for use with granite, quartz and for high cutting speed.

Only suitable for current machines equipped with disc rotation variator, amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0 023346

SAW BLADE Ø400 SPEEDMASTER - BORE Ø50/60 - GRANITE/ QUARTZ

Specific disc for use with granite, quartz and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0 024287

SAW BLADE Ø500 SPEEDMASTER - BORE Ø40/50 - GRANITE / QUARTZ

Specific disc for granite, quartz and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0 024723

SAW BLADE Ø350 SPEEDMASTER - BORE Ø50/60 - GRANITE / QUARTZ

Specific disc for use with quartz, granite and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0 024814

SAW BLADE Ø750 - Ø60 BORE - GRANITE/COMPOSITE

Specific disc for use with granite, quartz and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0 024873

SAW BLADE Ø400 - SEGMENTS 3.4 × 40 × 8 - BORE Ø50/60 - DEKTON / CERAMIC

0

022654

Specific disc for use with DEXTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø350 - SEGMENTS 3.2 × H8 BORE Ø50/60 - DEKTON / CERAMIC**

0

022746

Specific disc for use with DEXTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø350 - SEGMENTS 3.2 × H8 BORE Ø50/60 - NEXT**

0

025348

Specific disc for use with DEXTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø350 SILENT PLATE - SEGMENTS 3 × H1 - BORE Ø50/60 - QUARTZITE PLUS**

0

025660

Specific disc for use with QUARTZITE PLUS, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SET OF 14 DIAMOND DISCS Ø150 FOR ROUGHING**

0

K0000 578**INCLUDING :**

14 x 021297 CUTTING BLADE Ø150MM ATTACHMENT BORE Ø43MM - GRANITE

**X14****SET OF 7 SAW DISCS FOR MULTI-DISC CHUCK**

0

K0000 071**INCLUDING :**

7 x 021297 CUTTING BLADE Ø150MM ATTACHMENT BORE Ø43MM - GRANITE

**X7****SET OF 6 SAW BLADES FOR ACS SYSTEM - STONE**

0

K0000 409

Jigsaw blades for bridge saws equipped with an ACS option.

Ideal for having a perfect finish on the internal angles of a square sink. They also allow for the optimization of external cuts of slices - in multiple cutting.

INCLUDING :

6 x PP 01 942 DIAMOND JIGSAW BLADE LENGTH 55MM - FOR ACS DEVICE

**X6****SET OF 6 BLADES FOR ACS SYSTEM - GRANITE / QUARTZ / ULTRA COMPACT MATERIAL**

0

K0000 499

Jigsaw blades for bridge saws equipped with an ACS option.

Ideal for having a perfect finish of the internal angles of a square sink, they also optimize the use of a slab by sticking the pieces to cut together and finishing the saw blade cuts to separate them.

INCLUDING :

6 x PP 00 111 DIAMOND JIGSAW BLADE LENGTH 30 FOR ACS DEVICE

**X6**

SILENT SAW BLADE Ø500 - BORE Ø50/60 - CONCRETE

0

018028

Specific disc for use with CONCRETE, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

INCREMENTAL ROUTER Ø10×25 - ATTACHMENT 1/2 GAS - GRANITE / QUARTZ

Incremental routing cutter for machining hobs or sinks to fit flush with the worktop.

It also allows, in solid machining, to cut out small surfaces or the roughing of bas-reliefs.

0 018659

INCREMENTAL ROUTER Ø20×42 - ATTACHMENT 1/2 GAS - GRANITE / QUARTZ

Incremental routing cutter which allows for the making of recesses.

Segmented on the underside, it allows roughing in solid machining and the cutting out of small surfaces.
