SAW BLADE Ø200 FOR 90° ANGLE GEAR DEVICE - BORE Ø50 (6 HOLES Ø80) - GRANITE

0

014522

This segmented saw blade allows for thin sawing with a precise cut. Suitable for making a non-slip surface on stairs, for example.

**SAW BLADE Ø260 FOR 90° ANGLE GEAR DEVICE - BORE Ø50 (6 HOLES Ø80) - GRANITE**

0

016376

Segmented sawing disc.

Allows for thin sawing with a precise cut, suitable for making an anti-slip surface on stairs for example.

**SAW BLADE Ø1350 - BORE Ø100 - GRANITE**

0

016610

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

**SAW BLADE Ø1100 - LASER PLATE - BORE Ø100 - GRANITE**

0

021857

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

**SLIMING DISC Ø350 L15MM BORE ATTACHMENT Ø60 - GRANITE**

0

020192

Milling cutter for calibrating a granite table or removing slabs.

A perfectly calibrated saw table is the main condition for a precise cut,

**SILENT SAW BLADE Ø500 - ATTACHMENT BORE Ø100 - GRANITE / QUARTZ**

0

023582

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

**SAW BLADE Ø1600 L24 H10 EP10- BORE Ø40/50 LIMESTONE**

0

025431

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

**SAW BLADE Ø1350 - BORE Ø100 - MEDIUM HARDNESS LIMESTONE**

0

016611

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.

In the roughing phase, it can be used to rough or shape massive parts.

SAW BLADE Ø1100 LAZER CUT LIMESTONE

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.
In the roughing phase, it can be used to rough or shape massive parts.

0

018891

SILENT SAW BLADE Ø600 BORE Ø40/50- MEDIUM HARDNESS LIMESTONE

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.
In the roughing phase, it can be used to rough or shape massive parts.

0

023349

SAW BLADE Ø625 BORE Ø50/60 - SLATE STONE

Specific disc for use with marble, hard stone and for high cutting speed.
Only suitable for current machines equipped with disc rotation variator, amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0

026265

SAW BLADE Ø600 - ATTACHMENT BORE Ø50/60 - MARBLE / HARD STONES

0

019627

SAW BLADE Ø400 - SEGMENT 40X3.6X7 - BORE Ø50/Ø60- MARBLE / HARD STONE

Specific disc for use with marble, hard stone and for high cutting speed.
Only suitable for current machines equipped with disc rotation variator, amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

0

019623

HORIZONTAL SAW BLADE Ø625 LIMESTONE

Segmented saw blade for limestone. Allows perfect, splinter-free cuts.
In the roughing phase, it can be used to rough or shape massive parts.

0

020015

HORIZONTAL SAW BLADE Ø300 - REINFORCED STEEL CORE - BORE Ø60 (6/Ø100) - GRANITE

A thick segmented disc used horizontally for rapid shaping.
Generally referred to as a crushable disc, it is known for its price to performance ratio.

0

020396

SILENT SAW BLADE Ø400 - BORE Ø50/60 - GRANITE / QUARTZ

Segmented saw blade for granite. Allows perfect, splinter-free cuts.

0

020414

SAW BLADE Ø600 SPEEDMASTER PLATE - BORE Ø50/60 - GRANITE / QUARTZ

0

023346

Specific disc for use with granite, quartz and for high cutting speed.

Only suitable for current machines equipped with disc rotation variator, amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø400 SPEEDMASTER - BORE Ø50/60 - GRANITE/ QUARTZ

0

024287

Specific disc for use with granite, quartz and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø500 SPEEDMASTER - BORE Ø40/50 - GRANITE / QUARTZ

0

024723

Specific disc for granite, quartz and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø350 SPEEDMASTER - BORE Ø50/60 - GRANITE / QUARTZ

0

024814

Specific disc for use with quartz, granite and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø750 - Ø60 BORE - GRANITE / QUARTZ

0

024873

Specific disc for use with granite, quartz and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø400 - SEGMENTS 3.4 x 40 x 8 - BORE Ø50/60 - DEKTON / CERAMIC

0

022654

Specific disc for use with DEKTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø350 - SEGMENTS 3.2 x H8 BORE Ø50/60 - DEKTON / CERAMIC

0

022746

Specific disc for use with DEKTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø350 - SEGMENTS 3.2 x H8 BORE Ø50/60 - NEXT

0

025348

Specific disc for use with DEKTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

SAW BLADE Ø350 - SEGMENTS 3.2 × H8 BORE Ø50/60 - DEKTON / CERAMIC

0

026608

Specific disc for use with DEKTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø350 - BORE Ø50/60 - DEKTON / CERAMIC +**

0

026972

Specific disc for use with DEKTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø350 - BORE Ø50/60 CERAMIC / STONEWARE**

0

027027

Specific disc for use with Stoneware, DEKTON, ceramic and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø350 SILENT SHEET METAL - SEGMENTS 3×H1 - BORE Ø50/60 - QUARTZITE**

0

023885

Specific disc for use with quartzite and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SAW BLADE Ø400 - ATTACHMENT BORE Ø50/60 - QUARTZITE**

0

023923

Specific disc for use with quartzite and for high cutting speed.

Suitable only for current machines equipped with disc rotation variator and amperometric control, abundant watering system on the cutting position and a working table in perfect condition.

**SET OF 14 DIAMOND DISCS Ø150 FOR ROUGHING**

0

K0000 578**INCLUDING :**

1 x 021297 CUTTING BLADE Ø150MM ATTACHMENT BORE Ø43MM - GRANITE

**X14****SET OF 7 SAW DISCS FOR MULTI-DISC CHUCK**

0

K0000 071**INCLUDING :**

7 x 021297 CUTTING BLADE Ø150MM ATTACHMENT BORE Ø43MM - GRANITE

**X7****SET OF 6 SAW BLADES FOR ACS SYSTEM - STONE**

0

K0000 409

Jigsaw blades for bridge saws equipped with an ACS option.

Ideal for having a perfect finish on the internal angles of a square sink. They also allow for the optimization of external cuts of slices - in multiple cutting.

INCLUDING :

6 x PP 01 942 DIAMOND JIGSAW BLADE LENGTH 55MM - FOR ACS DEVICE

**X6**

SET OF 6 BLADES FOR ACS SYSTEM - GRANITE / QUARTZ / ULTRA COMPACT MATERIAL

0

K0000 499

Jigsaw blades for bridge saws equipped with an ACS option.

Ideal for having a perfect finish of the internal angles of a square sink, they also optimize the use of a slab by sticking the pieces to cut together and finishing the saw blade cuts to separate them.

INCLUDING :

6 x PP 00 111 DIAMOND JIGSAW BLADE LENGTH 30 FOR ACS DEVICE

**MILLING WHEEL Ø200 REVERSIBLE - ROUGHING - BORE ATTACHMENT Ø60 (6/Ø100) - GRANITE**

0 025087

Solid roughing milling cutter for CNC machine and manual machine. Reversible cutter.

Rapid machining for roughing surfaces for all heavy roughing work (solid sink, sculpture, molding, etc.).

**EDGE CALIBRATION MILLING TOOL Ø150X23X10 -20 SEG ATTACHMENT Ø60 - REVERSIBLE - GRANITE**

0 026006

Milling cutter allowing stone edge calibration.

Can also be used for roughing surfaces for all heavy roughing work.

Reversible cutter.

**MILLING WHEEL Ø150 REVERSIBLE - BORE ATTACHMENT Ø60 (6/Ø100) MARBLE - SOFT STONE**

0 025606

Milling wheel Ø150 for working marble.

Ideal for roughing flat surfaces or for shaping parts (solid sink, sculpture, etc.).

**DIAMOND PLATE Ø130 - ROUGHING - ATTACHMENT M24x200 - GRANITE**

0 015700

Sintered diamond cutter especially designed for shaping profiles (ideally suited for small radii up to 40mm).

**DIAMOND PLATE Ø200 - ROUGHING BORE ATTACHMENT Ø50 (6/Ø110) CMG GRANITE**

0 025839

Diamond plate for calibrating the edges of the pieces. To be used on TEP series machine

INCREMENTAL ROUTER Ø6×10 - 1/2 GAS ATTACHMENT - DEKTON / CERAMIC

Special DEKTON incremental routing cutter which allows for the machining of hobs or sinks to fit flush with the worktop.

0 019895

INCREMENTAL ROUTER Ø8×10 - 1/2 GAS ATTACHMENT - DEKTON / CERAMIC

Special DEKTON incremental routing cutter which allows for the machining of hobs or sinks to sit flush with the worktop.

0 019896

INCREMENTAL ROUTER Ø10×10 - 1/2 GAS ATTACHMENT - DEKTON / CERAMIC

Special DEKTON incremental routing cutter which allows for the machining of hobs or sinks to sit flush with the worktop.

0 019897

INCREMENTAL ROUTER Ø12×10 - 1/2 GAS ATTACHMENT - DEKTON / CERAMIC

Special DEKTON incremental routing cutter which allows for the machining of hobs or sinks to sit flush with the worktop.

0 019898

INCREMENTAL ROUTER Ø6×15 - 1/2 GAS ATTACHMENT - GRANITE / QUARTZ

Incremental router for machining hobs or sinks to fit flush with the worktop.

It also allows, in solid machining, to cut out small surfaces or the roughing of bas-reliefs.

0 018657

INCREMENTAL ROUTER Ø8×15 - 1/2 GAS ATTACHMENT - GRANITE / QUARTZ

Incremental routing cutter for machining hobs or sinks to fit flush with the worktop.

It also allows, in solid machining, to cut out small surfaces or the roughing of bas-reliefs.

0 018658

INCREMENTAL ROUTER Ø10×25 - 1/2 GAS ATTACHMENT - GRANITE / QUARTZ

Incremental routing cutter for machining hobs or sinks to fit flush with the worktop.

It also allows, in solid machining, to cut out small surfaces or the roughing of bas-reliefs.

0 018659

INCREMENTAL ROUTER Ø20×42 - 1/2 GAS ATTACHMENT - GRANITE / QUARTZ

Incremental routing cutter which allows for the making of recesses.

Segmented on the underside, it allows roughing in solid machining and the cutting out of small surfaces.
